bit about accommodating the variability of students through research into instructional methods and learning styles. If we vary our methods, we have learned, we accommodate a wider range of learning styles than if we used one method consistently. Teaching methods are the complement of content, just as instruction is the complement of curriculum.

Dick and Carey, Kemp, and Three-Phase Design models for Instructional Design Instructional design (ID) models can provide a systematic approach of implementing the instructional design process for specific educational initiatives (Morrison, Ross, & Kemp, 2004).

## **Analysis of Three Instructional Design Models**

Instructional design (ID), also known as instructional systems design (ISD), is the practice of systematically designing, developing and delivering instructional products and experiences, both digital and physical, in a consistent and reliable fashion towards an efficient, effective, appealing, engaging and inspiring acquisition of knowledge.

(e.g., simulation equipment) and software (e.g., computer-based instruction). Implementation The Implementation phase refers to the actual delivery of the instruction, whether it's classroom-based, lab-based, or computer-based. The purpose of this phase is the effective and efficient delivery of instruction.

The System for Effective School Instruction pulls together the Georgia School Performance Standards that are most relevant to assessment, curriculum and instruction and provides a model system intended for use by leaders and/or leadership teams in schools that do not have a system for instruction, or have a system that needs improvement.

## **System for Effective School Instruction**

Instruction Only recently have concepts and pro cedures for implementing such a truly school- wide individualized learning system evolved. The supervisor of curriculum development can initiate such a program throughout the entire school system, or he can begin with one model school or experimental demonstra tion center.
