Product safety data sheet (PSDS) is provided to customers as reference information in order to handle batteries safely. It is necessary for the customer to take appropriate measures based on this information. The information and recommendations set forth are made in good faith and are believed to be accurate at the date of preparation.

Fig. 1 shows a long degradation process of an impending fault in a machine, where an initial defect continues to proliferate, and eventually reaches a critical condition that causes the machine failure. We can conceptualize the task of diagnostics as an in-depth exploration of the failure to identify the leading cause after it has occurred, while prognostics is to investigate the problem ...

An automated guided vehicle or automatic guided vehicle (AGV) is a portable robot that follows markers or wires in the floor, or uses vision, magnets, or lasers for navigation. They are most often used in industrial applications to move materials around a manufacturing facility or warehouse. Application of the automatic guided vehicle broadened during the late 20th century.
