Computer science is the theory, experimentation, and engineering enabling the use of algorithms to process, store, and communicate digital information. A computer scientist studies the theory of computation and the practice of designing software systems. According to Owen Astrachan, computer science is the study of "automating algorithmic processes that scale".

The sign test is a statistical method to test for consistent differences between pairs of observations, such as the weight of subjects before and after treatment. Given pairs of observations (such as weight pre- and post-treatment) for each subject, the sign test determines if one member of the pair (such as pre-treatment) tends to be greater than (or less than) the other member of the pair ...
